

Publications for Karl Ng

2015

Hafner, J., Ghaoui, R., Coyle, L., Burke, D., Ng, K. (2015). Axonal excitability in primary amyloidotic neuropathy. *Muscle and Nerve*, 51(3), 443-445. [More Information]

Geevasinga, N., Menon, P., Sue, C., Kumar, K., Ng, K., Yiannikas, C., Kiernan, M., Vucic, S. (2015). Cortical excitability changes distinguish the motor neuron disease phenotypes from hereditary spastic paraplegia. *European Journal of Neurology*, 22(5), 826-831. [More Information]

Geevasinga, N., Menon, P., Nicholson, G., Ng, K., Howells, J., Kril, J., Yiannikas, C., Kiernan, M., Vucic, S. (2015). Cortical Function in Asymptomatic Carriers and Patients With C9orf72 Amyotrophic Lateral Sclerosis. *JAMA Neurology*, 72(11), 1268-1274. [More Information]

Hafner, J., Lee, G., Joester, J., Lynch, M., Barnes, E., Wrigley, P., Ng, K. (2015). Thermal quantitative sensory testing: A study of 101 control subjects. *Journal of Clinical Neuroscience*, 22(3), 588-591. [More Information]

2014

Liang, C., Howells, J., Kennerson, M., Nicholson, G., Burke, D., Ng, K. (2014). Axonal excitability in X-linked dominant Charcot Marie Tooth disease. *Clinical Neurophysiology*, 125(6), 1261-1269. [More Information]

Geevasinga, N., Burrell, J., Hibbert, M., Vucic, S., Ng, K. (2014). C9ORF72 familial motor neuron disease - frontotemporal dementia associated with lung adenocarcinoma and anti-Ma2/Ta antibodies: a chance association. *European Journal of Neurology*, 21(4), e31-e33. [More Information]

Geevasinga, N., Archer, J., Ng, K. (2014). Choking, asphyxiation and the insular seizure. *Journal of Clinical Neuroscience*, 21(4), 688-689. [More Information]

Liang, C., Ng, K. (2014). Comparing axonal excitability in past polio to amyotrophic lateral sclerosis. *Muscle and Nerve*, 50, 602-604. [More Information]

Ng, K. (2014). MADSAM neuropathy: An unusual cause of pseudoathetosis. *Neurology*, 83(3), 291. [More Information]

Hafner, J., Kumar, K., Mulligan, S., Ng, K. (2014). Multifocal central nervous system demyelination and Lhermitte's phenomenon secondary to combination chemotherapy for chronic lymphocytic leukaemia. *Journal of the Neurological*

Sciences, 338(1-2), 218-219. [More Information]

Ng, K., Murray, N., Burke, D. (2014). Peripheral nerve excitability before and after liver transplant. *Muscle and Nerve*, 49(4), 615-616. [More Information]

Tan, A., Ng, K., Newey, A., Leong, G. (2014). Subacute delayed ascending myelopathy: not just a post-traumatic disorder. *Spinal Cord*, 52(24), 11-13. [More Information]

2013

Ng, K., Kumar, K., Sue, C., Burke, D. (2013). Axonal excitability during ischemia in MELAS. *Muscle and Nerve*, 47(5), 762-765. [More Information]

Ng, K., Howells, J., Pollard, J., Burke, D. (2013). Different mechanisms underlying changes in excitability of peripheral nerve sensory and motor axons in multiple sclerosis. *Muscle and Nerve*, 47(1), 53-60. [More Information]

Geevasinga, N., Day, B., Ng, K. (2013). Multifocal motor neuropathy and muscle hypertrophy. *Internal Medicine Journal*, 43(11), 1237-1239. [More Information]

Geevasinga, N., Simon, N., Collins, S., Buckland, M., Ng, K. (2013). Sporadic Creutzfeldt-Jakob disease presenting as spastic paraparesis. *European Journal of Neurology*, 20(5), e73-e74. [More Information]

Kumar, K., Blair, N., Vandebona, H., Liang, C., Ng, K., Sharpe, D., Grnewald, A., GÄlnitz, U., Saviouk, V., Rolfs, A., Sue, C., et al (2013). Targeted next generation sequencing in SPAST-negative hereditary spastic paraplegia. *Journal of Neurology*, 260(10), 2516-2522. [More Information]

2012

Kumar, K., Sue, C., Burke, D., Ng, K. (2012). Peripheral neuropathy in hereditary spastic paraplegia due to spastin (SPG4) mutation - A neurophysiological study using excitability techniques. *Clinical Neurophysiology*, 123(7), 1454-1459. [More Information]

Ha, A., Parratt, K., Rendtorff, N., Lodahl, M., Ng, K., Rowe, D., Sue, C., Hayes, M., Tranebjaerg, L., Fung, V. (2012). The Phenotypic Spectrum of Dystonia in Mohr-Tranebjaerg Syndrome. *Movement Disorders*, 27(8), 1034-1040. [More Information]

Ng, K., Lee, G., Joester, J., Lynch, M., Barnes, E. (2012).

Thermal quantitative sensory testing (QST)-A normative study of 100 controls. *Clinical Neurophysiology*, 123, e76-e76.

2011

Ng, K., Kumar, K., Brew, B., Burke, D. (2011). Axonal excitability in viral polyneuropathy and nucleoside neuropathy in HIV patients. *Journal of Neurology, Neurosurgery and Psychiatry*, 82(9), 978-980. [More Information]

Kumar, K., Liang, C., Needham, M., Burke, D., Sue, C., Ng, K. (2011). Axonal hyperpolarization in inclusion-body myopathy, paget disease of the bone, and frontotemporal dementia (IBMPFD). *Muscle and Nerve*, 44(2), 191-196. [More Information]

Chang, F., Berman, Y., Buckland, M., MacKinlay, N., McGlade, A., Collins, S., Ng, K. (2011). Genetic prion disease-associated myelodysplasia and SIADH in siblings. *European Journal of Neurology*, 18(12), e149-e150. [More Information]

Simister, R., Ng, K., Lang, B., Beckles, M., Chao, D., McCabe, D. (2011). Sequential fluctuating paraneoplastic ocular flutter-opsoclonus-myoclonus syndrome and Lambert-Eaton myasthenic syndrome in small-cell lung cancer. *Journal of Neurology, Neurosurgery and Psychiatry*, 82(3), 344-346. [More Information]

2010

Kumar, K., Ng, K., Vandebona, H., Davis, M., Sue, C. (2010). A novel CLCN1 mutation (G1652A) causing a mild phenotype of Thomsen disease. *Muscle and Nerve*, 41(3), 412-415. [More Information]

Chan, Q., Ng, K., Vandervord, J. (2010). Critical illness polyneuropathy in patients with major burn injuries. *Eplasty: open access journal of plastic surgery committer to the free exchange of knowledge in a global community*, 10, 568-574. [More Information]

Kumar, K., Ng, K. (2010). Don't hold your breath: anoxic convulsions from coupled hyperventilation-underwater breath-holding. *Medical Journal of Australia*, 192(11), 663-664. [More Information]

Rejdak, K., Petzold, A., Ng, K., Afra, J., Dujmovic, I., Stelmasiak, Z., Ryglewicz, D., Kwiecinski, H., Grisold, W., Vecsei, L., et al (2010). Neurology training around the world: asking the trainees. *Lancet Neurology*, 9(1), 32-3. [More Information]

Ng, K., Winter, S., Sue, C., Burke, D. (2010). Preserved motor axonal membrane potential in mitochondrial disease. *Journal of Neurology, Neurosurgery and Psychiatry*, 81(8), 844-846. [More Information]

Kumar, K., Ng, K. (2010). Reduced facial nerve hyperexcitability from contralateral cerebral stroke in hemifacial spasm. *Movement Disorders*, 25(9), 1310-2. [More Information]

Information]

Kumar, K., Needham, M., Mina, K., Davis, M., Brewer, J., Staples, C., Ng, K., Sue, C., Mastaglia, F. (2010). Two Australian families with inclusion-body myopathy, Paget's disease of bone and frontotemporal dementia: novel clinical and genetic findings. *Neuromuscular Disorders*, 20(5), 330-334. [More Information]

2009

Leong, G., Gorrie, C., Ng, K., Rutkowski, S., Waite, P. (2009). Electrical perceptual threshold testing: a validation study. *Journal of Spinal Cord Medicine*, 32(2), 140-146. [More Information]

2008

Ng, K., Howells, J., Pollard, J., Burke, D. (2008). Up-regulation of slow K⁺ channels in peripheral motor axons: a transcriptional channelopathy in multiple sclerosis. *Brain*, 131(11), 3062-3071. [More Information]

2007

Ng, K., Lin, C., Murray, N., Burroughs, A., Bostock, H. (2007). Conduction and excitability properties of peripheral nerves in end-stage liver disease. *Muscle and Nerve*, 35(6), 730-738. [More Information]

Ng, K., Burke, D. (2007). Nerve Excitability Studies in the Present Era. *Advances in Clinical Neuroscience & Rehabilitation*, 7(5), 29-30.

Gunja, N., Dowsett, R., Ng, K. (2007). Raw salmon or red herring: ascending paralysis with suspected seafood poisoning. *Medical Journal of Australia*, 187(8), 468-469. [More Information]

Ng, K., Jones, S. (2007). The α -enhanced N35 α somatosevoked potential: its associations and potential utility in the clinical evaluation of dystonia and myoclonus. *Journal of Neurology*, 254(1), 46-52. [More Information]

2003

Spratt, N., Wang, Y., Levi, C., Ng, K., Evans, M., Fisher, J. (2003). A prospective study of predictors of prolonged hospital stay and disability after stroke. *Journal of Clinical Neuroscience*, 10(6), 665-669. [More Information]
